Feature: Validate information from Your Logo Site

As a user I want to login to the site, insert or remove products from the cart, conduct research and make a purchase in order to ensure a good usability experience

Scenario 01: Validate Successful Login
　　　　Given the site login screen
　　　　When I enter my valid email and password
　　　　Then I am successfully redirected to the Home page

Scenario 02: Validate incorrect login
　　　　Given the Site Login screen
　　　　When I enter an invalid email and password
　　　　Then the site displays the message: Authentication Failed

Scenario 03: Validate Search existing product
　　　　Given that I'm on the home page of the site
　　　　When I search for "Printed Chiffon Dress"
　　　　And click on the Search button
　　　　Then the product "Printed Chiffon Dress" should be listed on the search result page

Scenario 04: Validate Search for non-existent product
　　　　Given that I'm on the home page of the site
　　　　When I search for the product "ProductNonExistent"
　　　　And click on the Search button
　　　　Then the page should display the message "No results were found for your search "ProductNonExistent""

Scenario 05: Validate Add Products to Cart
　　　　Given that I'm on the home page of the site
　　　　When I search for the product "t-shirt"
　　　　And add the product to the cart
　　　　Then the cart screen should be shown together with the product data and values

Scenario 06: Validate Remove Products
　　　　Given that I'm on the home page of the site
　　　　And there is the product "t-shirt" added to the cart
　　　　When to delete the product from the cart
　　　　Then the page should display the message "Your shopping cart is empty."

Scenario 07: Validate Add Client
　　　　Given that I'm on the home page of the site
　　　　When I request new customer registration

Then the registration must be successful

Scenario 08: Validate Product Information
Given I search for the product "t-shirt"
When I click on the product
Then I can see information regarding the product

Scenario 09: Validate Make purchase
Given I search for the product "t-shirt"
When I add the product to the cart
And I fill in the purchase information
Then the purchase is successful

Scenario 10: Validate Product List
Given that I'm on the home page of the site
When I access the "Women" category
And consult the sub-category "Summer Dresses"
Then the page should display products from the "Summer Dresses" sub-category
